Manda's Triumph.—This grand Rose is of free growth, luxuriant foliage, and produces the most perfect Rose flowers, beautifully imbricated and well formed, two inches in diameter and sweetly scented.

Universal Favorite.—This is the most vigorous plant of the set. The long, branching shoots are covered with dense, bright green foliage. The double flowers are over two inches in diameter, and of a beautiful soft apricot color, and delicately fragrant. A grand variety for any purpose.
Pink Rose.—This is without question a Hybrid between the Sweetbrier and Wichuriana, and carries these characteristics in bloom, while the growth, which is very rampant, and the luxurious foliage partake more of the Wichuriana. The single flowers, which are produced in close heads, are nearly two inches in diameter, bright rich pink, with almost a white center, which lightens up the orange-red stamens, producing an effect which, combined with fragrance, makes it one of the most valuable Roses in cultivation.

New Memorial Rose, MRS. LOVETT. A double bright pink, form of Rose Wichuriana. In every respect it is a true Memorial Rose, save the flowers. In habit of growth and foliage, hardiness and abundance of bloom it is identical with its parent, but its Roses are double, two and a half inches in diameter, of bright, rosy-pink color. Price, 16 cents each; 75 cents per dozen; $6.00 per hundred.

THE "THREE GRACES." Price, 10 cents each; 50 cents per dozen; $3.50 per hundred.
The Yellow Rambler.—(Arguta). The Yellow Rambler has been found to successfully withstand, without protection, a continued temperature of from zero to two degrees below, which proves it to be harder than any other yellow climbing Rose yet introduced, and we believe that by laying the plants down in the Winter it can be successfully grown in nearly all the United States. We would recommend this Rose, where that other Roses succeed at all well. The flowers are borne in immense clusters, after the same manner as the Crimson Rambler, often as many as one hundred and fifty blossoms in a bunch. The color is a decided yellow. The flowers are very sweet-scented. The habit of growth is very vigorous, well-established plants often making shoots of from eight to ten feet in height in a single season. The plants do not bloom at quite so early an age as the Crimson Rambler, but as soon as well established they more than make up for this by the magnificence of the flowers they produce.

White Rambler.—(Thalia). Of German origin and in habit of growth, foliage, manner of blooming, form of flowers and hardiness it is said to be identical with Crimson Rambler, of which it is a blood relative, but that the flowers are pure snow-white and sweetly scented. The flowers remain on the bush from three to five weeks; beautiful to behold.

Pink Rambler.—(Euphrasyn). What is said of White Rambler applies equally to this, except the color of the flowers is pure shiny-rose—the partially open buds being bright, light carmine, thus producing a strong and pleasing contrast. "The numerous yellow stamens lend an additional charm to the flower. In hardiness, freedom of bloom, form and color of flowers and vigorous climbing habit, this variety is fully the equal of Crimson Rambler."

### The Hardy Chinese MATRIMONY VINE.

The old-fashioned Matrimony Vine was a general favorite more than fifty years ago, but in beauty of flower, fruit and foliage it cannot compare with this superb variety. A most vigorous, hardy climbing plant when trained to an arbor, fastened to a fence, attached to a tree, to the side of a house, the pillars of a piazza, or in any location where a hardy, vigorous climber is desired, it sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers, which are succeeded by brilliant scarlet berries nearly an inch long, every branch being loaded with them. **Price.** 50 cents per dozen; $3.00 per hundred.
